EXAMINER'S AMENDMENT AND REASON FOR ALLOWANCE

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Pursuant to MPEP 606.01, the title has been changed to read:

--METHOD, SYSTEM, AND PROGRAM FOR MANAGING DATA READ OPERATIONS
ON NETWORK CONTROLLER WITH OFFLOADING FUNCTIONS --

Election/Restrictions

Claims 1-20 were withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species I, their being no allowable generic or linking claim. Election was made without traverse in the reply filed on 3/27/07. This application is in condition for allowance except for the presence of non-elected claims 1-20, accordingly, claims 1-20 have been cancelled.

The application has been amended as follows:

Claims 1-20 – CANCELLED (species I)

Art Unit: 2182

Newly cited Prior Art: Pinkerton et al. (US 7,181,531) discloses a method to synchronize and upload an offloaded network stack connection with a network stack.

The following is an examiner's statement of reasons for allowance based on the newly cited prior art above and previously cited prior art; therein, claims 21-42 include allowable subject matter and considered pertinent to the applicant's disclosure, taken individually or in combination, the prior art of record and the newly filed prior art above does not teach or suggest the claimed limitations having " a target controller coupled to the bus, data storage controller for managing Input/Output (I/O) access to the target storage, including processing read commands addressing target data having target addresses within said target storage; a device driver executable by the processor in the memory; and a network controller coupled to the bus and having an offload engine and a cache adapted to store target data from at least one target address of said target storage, said network controller being adapted to: receive from the initiator, a packet containing a read command which addresses target data having a target address within said target storage; and compare the target address of the read command to a target address of the target data in the cache for the network controller engine; wherein said offload engine is adapted to process said read command if target data stored in the cache was obtained from a target address which corresponds to the read command target address, said processing including sending target data stored in the cache through the network to the initiator and wherein said read command is processed by said network controller instead of said target controller.

Art Unit: 2182

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
